

SHARED NODES AND VIRTUAL-MACHINE DUTIES

One host fault can hit many tenants.

You provision virtual machines on shared hosts. Define customer and provider duties for isolation and resources; service claims, security events and physical breakdown have different loss triggers.

RISKS WORTH DISCUSSING

- 01 Provisioning or resource-allocation errors
- 02 Unauthorized cross-tenant data access
- 03 Internal failures of physical host equipment

Coverage worth discussing

Professional liability

Covered claims from accepted VPS/provisioning duties.

General liability

Covered nonprofessional facility physical claims.

Cyber liability

Covered multitenant-system response and privacy claims.

Equipment breakdown

Covered internal failures of accepted physical systems.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
