

WATER STORAGE AND DISTRIBUTION

A broken main can flood nearby property.

You operate systems to pump, store, and distribute water for households or crops, where mechanical failures or main breaks cause significant property damage.

RISKS WORTH DISCUSSING

- 01 Disputed water quality claims
- 02 Canal or main storage failure
- 03 Critical pump or control disruption

Coverage worth discussing

Commercial property

Insured pumping and expressly accepted distribution assets.

Environmental liability

Covered cleanup involving accepted treatment-chemical releases.

Directors and officers

Covered governance claims for accepted utility entities.

General liability

Covered third-party harm from accepted water-supply duties.

Equipment breakdown

Covered internal failures of accepted treatment machinery.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
