

MOISTURE PROTECTION

A failed barrier can let water into the building.

You apply coatings to protect structures, where system failure, chemical fumes, or overspray create liability concerns.

RISKS WORTH DISCUSSING

- 01 System failure and intrusion
- 02 Chemical handling and fumes
- 03 Overspray and pollution

Coverage worth discussing

General liability

Addresses damage when a membrane system fails.

Environmental liability

Helps with pollution cleanup from coating work.

Workers compensation

Provides benefits for crews facing fume risks.

Inland marine

Protects sprayers and excavation gear from loss.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
