

WEBSITES, EMAIL AND HOSTING CONTROLS

A DNS error can disrupt client sites.

You maintain customer websites, email and databases. Accepted hosting and content roles should match reseller dependencies; data incidents, service claims and physical server damage need distinct terms.

RISKS WORTH DISCUSSING

- 01 DNS or email configuration failures
- 02 Compromised hosting controls or backups
- 03 Claims involving hosted customer content

Coverage worth discussing

Professional liability

Covered claims under accepted hosting/media-service terms.

General liability

Covered nonprofessional office/facility physical claims.

Cyber liability

Covered hosting-data response and privacy liability.

Commercial property

Insured owned server hardware after covered damage.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
