

WET MILLING AND STARCH PROCESSING

Starch dust can feed a blast.

You steep and separate corn through continuous process systems. Dust, failed centrifuges and wastewater releases need different plant, equipment and pollution terms.

RISKS WORTH DISCUSSING

- 01 Combustible grain and starch dust
- 02 Process machinery and centrifuge failure
- 03 Wastewater and environmental discharge exposure

Coverage worth discussing

Commercial property

Insured silos and process vessels after covered damage.

Environmental liability

Covered cleanup under accepted process-discharge terms.

Workers compensation

Work-injury benefits for eligible milling employees.

Equipment breakdown

Covered internal failures of accepted centrifuges or dryers.

Products liability

Covered resulting harm from supplied starch products.

Coverage is subject to policy terms and exclusions.

Why The Southern Agency

01 Listen

We review your operations, coverage and past claims.

02 Assess

We look at hazards and ways to reduce risk.

03 Build

We compare carriers, premiums and audit terms.

04 Support

We revisit coverage as your work changes.
